

UN OneHealth Tool

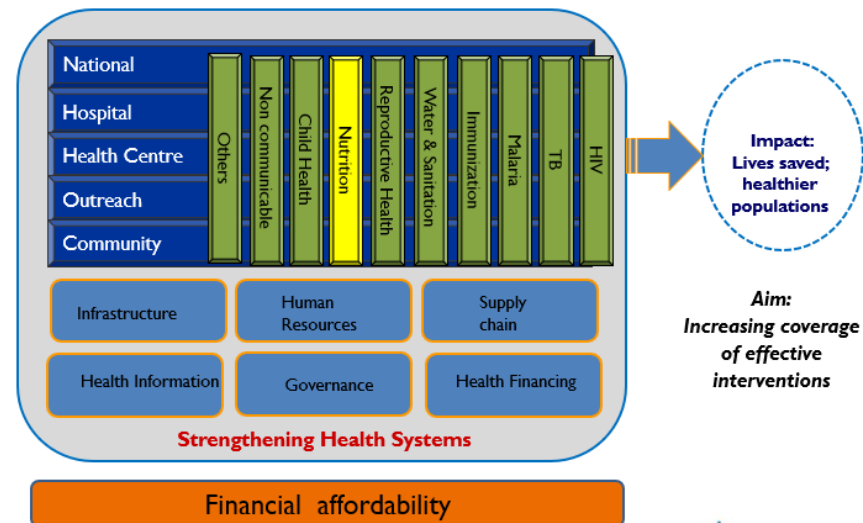

Lina Mahy

Department of Nutrition and Food Safety

With thanks to Kaia Engesveen

UN OneHealth Tool

- Joint UN tool for modelling costs and impact of health plans
 - Interagency Working Group on Costing: UNFPA, UNICEF, UNDP, UNAIDS, UNWOMEN, WHO and the World Bank
 - System-wide approach rather than vertical programmes
 - Ingredients-based costing
- Modular:
 - Costing by programmes (e.g. nutrition)
 - Costing by health system
 - Impact modules (e.g. LiST - Lives Saved Tool, NCD impact module)
 - Health sector wide financial space analysis

Planning and costing nutrition actions

The OneHealth Tool allows users to

- estimate
 - cost and impact of different scaling-up scenarios
 - cost and impact of changes in treatment guidelines
- plan human resources development and the strengthening of systems for nutrition
- produce evidence-based assessment of costs and benefits, to advocate for increased investment in nutrition

Nutrition interventions in the OneHealth Tool

- Currently OHT nutrition module
 - WHO 2013 Essential Nutrition Actions with nutrition interventions targeting undernutrition and the 1,000 days
- Ongoing updates
 - WHO 2019 Essential Nutrition Actions (<https://www.who.int/nutrition/publications/essential-nutrition-actions-2019/en/>)
 - Targeting all forms of malnutrition
 - Targeting the entire life course
 - e-Library of Evidence for Nutrition Action (who.int/elena)
 - New guideline work, e.g. GDG on healthy diet policy actions
 - Protocols for treatment of micronutrient deficiencies
- All default data and assumptions can be customized according to national context

Using OneHealth Tool for costing interventions to reduce anaemia

- Default assumptions included for
 - Prevention (weekly and daily) and treatment through supplementation in
 - Children
 - Adolescent girls and WRA
 - Pregnant women
 - Fortification of staple foods with iron and folic acid
- Consider using OneHealth Tool when
 - Country already uses or is planning to use OneHealth Tool for sector wide or specific health plans (e.g. Health Sector Strategic Plan, maternal child health plan, nutrition plan)
 - Programme will largely be implemented by the health sector
